

Annual Emergency Skills Training

On Monday 2nd to Thursday 5th March you may notice a slight decrease in appointment availability. This is to enable vital annual emergency skills training to be delivered to our GP and hospital nurse team. This will take place over four days, and whilst being delivered, will make use of cutting-edge simulation technology to enable real-time scenario training in emergency medical assessment.

Please bear with us whilst we ensure that our staff have access to this. Our reception team will guide patients to the most appropriate appointments.

Images here are all from previous simulated scenarios over the last couple of years.
